

Corporation Pop

21–23 Shudehill

Manchester

M4 2AF

Software Engineer. Salary depending on experience.

Corporation Pop is an award-winning digital innovation agency. We deliver strategic, thoughtful and innovative design and technology solutions that respond to user needs. We are well known for our work in immersive technologies and earlier this year we were listed by Clutch, the international and impartial review site, as one of the top 15 mobile app development companies in the UK. In everything we do we aim for innovation and originality. In everything we deliver we promise reliability and effectiveness. We value creativity and encourage experimentation.

It is for these reasons that companies like Future PLC, Channel 4, the BBC, Cyber Security Challenge, the NHS and Live Nation choose to work with us to deliver exciting and often ground-breaking projects across a range of media and devices.

The role:

We are now looking for an experienced Software Engineer to join our rapidly growing team. This is an exciting opportunity to work as part of a highly experienced team across all our projects, ranging from Android and iOS apps, to heavy load websites and multi-player gaming environments. The role is a varied one which will include working on back-end systems across all our projects.

The ideal candidate will have had at least 2 years of commercial experience and a relevant degree in Computer Science, Information Technology or similar.

It is essential that you can tick all of the following:

- Have solid PHP experience and knowledge of at least one of: Python, Javascript, Java or Swift
- Are experienced in MySQL or Postgres
- Have experience of managing hosting environments
- Understand best practices and principles of software testing
- Are able to communicate both problems and solutions to the wider team and to customers
- Have proven problem-solving ability.

It would be great if you can tick one or more of the following:

- Are familiar with Agile Methodologies (eg DSDM Atern, SCRUM)
- Are experienced in managing and maintaining networks and firewalls
- Experience working with Docker for local development and/or deployment
- Have a good understanding of cyber security best practice
- Are familiar with strategies for managing large online load spikes
- Have experience working with external Penetration Testers
- Have experience with CI.

In return we will provide:

- A great working environment in Manchester's Northern Quarter
- A friendly, supportive and highly experienced team
- Ride-to-work, profit-share and referral bonus schemes
- 25 days holiday a year in addition to bank holidays
- Flexi-time

Please send CV and covering letter explaining why you're right for this job to jobs@corporationpop.co.uk. Please also state your salary expectations. We are keen to appoint to this position as soon as possible and will close applications as soon as we see a CV that excites us.
