Software Engineer. Salary depending on experience.

Corporation Pop is an award-winning digital innovation agency. We deliver strategic, thoughtful and innovative design and technology solutions that respond to user needs. We are well known for our work in immersive technologies and earlier this year we were listed by Clutch, the international and impartial review site, as one of the top 15 mobile app development companies in the UK. In everything we do we aim for innovation and originality. In everything we deliver we promise reliability and effectiveness. We value creativity and encourage experimentation.

It is for these reasons that companies like Future PLC, Channel 4, the BBC, the NHS and Live Nation choose to work with us to deliver exciting and often ground-breaking projects across a range of media and devices.

The role:
We are looking for an experienced full stack Software Engineer to join our rapidly growing team. This is an exciting opportunity to work as part of a highly experienced team across all our projects, ranging from Android and iOS apps, to heavy-load websites and multi-player gaming environments. The role is a varied one which will include working on back-end systems across all our projects.

It is essential that you can tick all of the following:
- At least 3 years of commercial experience
- In-depth experience of a first object-oriented language (PHP, Java, Python or C#)
- Good working knowledge (commercial or personal) of a second object-oriented language
- Experience using MySQL or Postgres, native SQL as well as via an ORM
- Experience managing both cloud and dedicated hosting environments, preferably in a containerised environment
- Strong cyber security best practise knowledge
- Experience working in an Agile project environment
- Demonstrable problem-solving ability
- A strong desire to learn new technologies and methodologies.

It would be great if you can tick one or more of the following:
- Have experience of using TDD, BDD or pair programming
- Are experienced in managing and maintaining networks and firewalls
- Are familiar with strategies for managing large online load spikes
- Have experience working with external Penetration Testers
- Have experience in software testing
- Have experience with CI.

In return we will provide:
- A great working environment in Manchester's Northern Quarter
- A friendly, supportive and highly experienced team
- Ride-to-work, profit-share and referral bonus schemes
- Up to 30 days holiday a year (staring at 24 days plus an extra day for every year worked)
- 35 hrs a week flexi-time

Please send CV and covering letter explaining why you're right for this job to jobs@corporationpop.co.uk. Please also state your salary expectations. We are keen to appoint to this position as soon as possible and will close applications as soon as we see a CV that excites us.
