Job Description

Senior Project Manager. Salary: 40 – 50k*

Corporation Pop is an award-winning digital innovation agency. We deliver strategic, thoughtful and innovative design and technology solutions that respond to user needs. We are well known for our work in immersive technologies and recently were listed by Clutch, the international and impartial review site, as one of the top 15 mobile app development companies in the UK. In everything we do we aim for innovation and originality. In everything we deliver we promise reliability and effectiveness. We value creativity and encourage experimentation.

It is for these reasons that companies like Future PLC, Channel 4, the BBC, the NHS and Live Nation choose to work with us to deliver exciting and often ground-breaking projects across a range of media and devices.

The role:

We are looking for an experienced Project Manager to join our team. You'll be responsible for the day-to-day running of projects across our portfolio, working on high-profile projects in mobile, web and desktop and immersive technologies such as AR and VR. You'll work closely with our design and development teams throughout the full development lifecycle: creating user stories; managing the resourcing of our sprints across projects; coordinating with clients, devs, designers and testers to ensure quality throughout.

You'll bring a real enthusiasm and passion for software delivery, along with experience of managing projects concurrently for multiple clients. You'll be comfortable working directly with clients and internal teams, and be able to communicate technical and product-focused information between the two. You'll work with the team at all levels, and will understand how to manage data and reporting to collaboratively resource all projects in the studio. Digital Agency experience is preferred but not essential.

We'd love to speak to you if you have:

- at least 3 years commercial experience in a similar project management role
- strong understanding of Agile development across the software development lifecycle
- great communication skills, including stakeholder engagement
- experience with ticketing and time management software for managing day-to-day work and reporting
- an enthusiastic and can-do approach to motivating a team.

It would be great if you also have:

- previous digital agency experience
- an Agile or other project management qualification
- strong technical literacy.

In return we will provide:

- a great working studio environment (with roof terrace) in Manchester's Northern Quarter
- a friendly, supportive and highly experienced team
- 35 hour flexi-time working week
- flexible 'work anywhere' approach
- up to 30 days holiday plus bank holidays
- ride-to-work, profit-share and referral bonus schemes

Please send your CV (with links to recent projects) and covering letter explaining why you're right for this job to jobs@corporationpop.co.uk. We are keen to appoint to this position as soon as possible and will close applications as soon as we see a CV that excites us.
